

**PLEASE PASS TO YOUR  
ELECTRICAL  
DESIGN DEPT.**

Dear Customer

Welcome to our December bulletin.

This month, I am pleased to announce the launch of two additions to our already extensive range of current transformers:

TAS227  
TAS237

These incorporate three separate current transformers in the one housing, so this design saves both space and installation time. A very useful feature is the built-in terminal cover, which means that secondary contacts are protected from being accidentally touched. These products are supplied with steel fixing feet and a DIN-rail mounting clip as standard. For further details please see this month's product feature, over.

On a seasonal note, our Christmas holiday this year starts at lunchtime on 23rd December 2004 and we return to work on Tuesday 4th January 2005. During the closure period, we operate a skeleton staff service for our customers' technical and sales-based enquiries.

May we take this opportunity to thank you all for your custom during this year and wish you a very happy Christmas and successful New Year, 2005.

Yours sincerely

Gary Brookes  
Managing Director

**PRODUCT FOCUS**

**THE PRODUCT**

A range of high quality 3 phase current transformers in a single housing suitable for primary currents from 40A to 800A.

**FEATURES**

- 27mm and 37mm diameter apertures.
- Hinged terminal cover.
- Steel fixing feet & DIN rail mounting adaptor supplied.
- Screw terminal with dual connection facility for access from both sides of transformer
