

APPLICATION

To measure direct currents and deliver a proportional millivolt output signal.

**Model DER
Standard 'DIN'
Shunts**

Accuracy Class 0.5

- Overloads - 1.2 In continuous
- 10 In for 5 seconds up to 250A
- 5 In for 5 seconds from 251 up to 2000A
- 2 In for 5 seconds from 2001 up to 10000A

As the shunt dissipates energy, it is subject to heating. To avoid over-heating it is necessary to clean the contacts (bar-shunt) and tighten bolts firmly.

Insulated base supplied up to 25A complete with:
 * 2 screws TCM 5x8 DIN 84-4.3 * 2 washer 5.3 DIN 433 st
 * nuts to fix the shunt to the bar.

DC VOLTAGE DIVIDER

To reduce D.C. voltage in ranges up to 10,000V with output 0-100Vdc. Details on request

OPTIONS

75, 100 or 300mV output, H₂S ambient protection. Details on Request

Information Required With Order

- Model reference • Current range • Output signal
- Example: DC Shunt Type DER. Range 0 - 600A DC. Output 60mV
